This table is based off of Keith's finder charts that he has created to simulate games quickly, which is useful for single team replays.

To use the chart, find the home team on the left, and find the visitor at the top. Roll both dice, and read them as you would for a play.

If the dice roll is within the range listed, the home team wins. If the dice roll falls outside this range, the visiting team picks up the win.

If the dice roll is exactly what the last number on the win range is, the game goes into overtime.

Roll the dice again and consult the Overtime chart for the home team. If the dice roll falls within the range, the home team wins.

If the dice roll falls outside the range, the visiting team wins. If the dice roll matches the last number of the OT range, the game ends in a tie.

Saskatchewan 9-9

BC 7-11

77th Grey Cup: Saskatchewan 43, Hamilton 40

Dark clouds continued to hover over the Canadian League in 1989, as a massive reduction in TV money in 1987 coupled with the skyrocketing costs of pro football as the 80's drew to a close put quite a few teams, some community owned, some privately owned, in financial peril. While this was going on in the background, and sometimes the foreground, the league continued to put on entertaining football, which included record setting performances in Edmonton, a revival in Saskatchewan, with the club making the playoffs for the second year in a row after missing them for 11 straight seasons, and a Hamilton team soaring to the top of the East. Saskatchewan pulled a major upset by beating Edmonton in the West Final, and pulled off only their second championship win in their existence in Toronto's new retractable roof stadium by beating Hamilton in a championship game that always comes up when the best Canadian finals are discussed.

I have created this season with the help of Keith's how-to guide for Second Season football, plus the adjustments he suggests for Canadian play. If you believe I have made an error, or have a suggestion, feel free to reach out to me as well. The documentation available for past Canadian seasons isn't always as detailed as I'd like it to be, especially for depth charts for defences and O-Lines.

I have included finder charts for those who use them. I have tried to make these as accurate to the real statistics as I could, although every so often, it was difficult to be as precise as I wanted to, as teams didn't always do things that rounded nicely into 20! Sometimes I've included the names of multiple players on one die result, this needed to be done to make the percentages work out. Sometimes I had a lot of players with 1 of a particular category (usually sacks or interceptions), and adding all those players would mean reducing one of the top players' percentages, so I've included Choice as an option instead of adding 5 or 6 names to a die result. It shouldn't affect the way the top stars accumulate statistics.

There is also an instant results finder chart for those gamers that like doing single team replays. Thanks again for taking the time to download my season, and please let me know if you enjoy it!
